# OUR COMMITMENTS

## We consider the choices we make have an impact

At **CMS EXIM**, our devotion towards safety, reliability, sustainability, and community outreach guarantees your enduring success.

### Safety

We will never undermine our people's safety. Our goal is to have no incidents, and our lost time frequency rate is among the best in the industry.

### Reliability

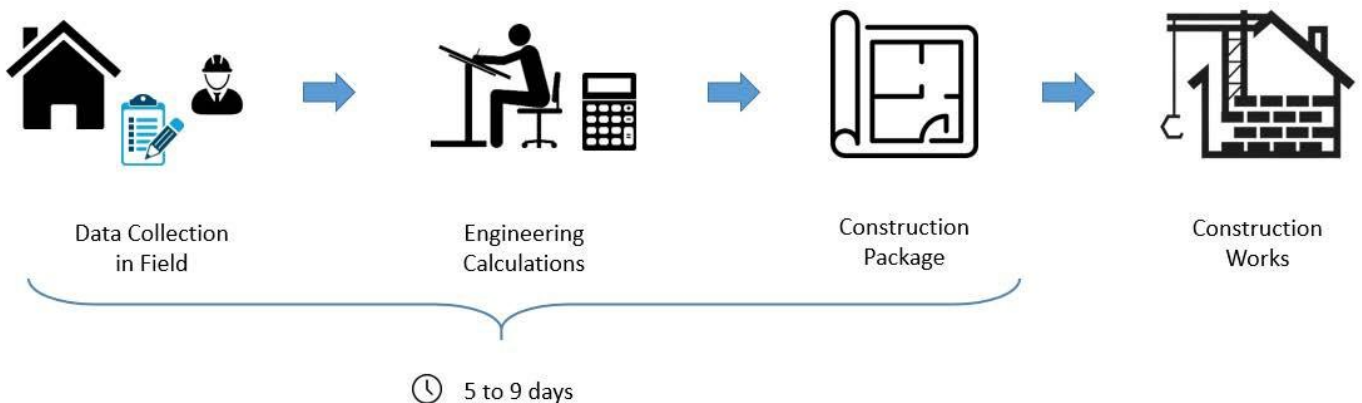

We strive to complete projects on time and on budget. Our organizational excellence instills reliability ideals that tangibly illustrate efficiency.

### Sustainability

Our sustainability model advocates a holistic approach that includes stakeholders, individuals, projects, and places in addition to sustainable development.

### Collaboration

We agree that shared respect and free and truthful dialogue between our customers, collaborators, and ourselves are the foundations of a great partnership.

# MISSION & VISION

## Mission

Our mission is to promote sustainable living and foster enduring relationships with our people, partners, and clients.

## Vision

Our vision is to become the highest-value provider of eco-friendly industrial building, green construction services, and technical expertise.

# OUR JOURNEY MAP

## **Continuous innovation helps us build a better future**

We deliver high-quality outcomes on strict deadlines while ensuring everyone's safety. We focus on emerging technologies to improve project reporting, collaboration, and communications, and to leverage data analytics, quality control, and risk management. We promote coordinated design testing, optimization, and constructability, as well as streamline commissioning and retention processes.

**CMS EXIM** is indebted to its employees for their constant effort that ensures growth, to its customers for their voice of satisfaction that encourages and inspires, and to other stakeholders for their confidence that creates the road to the future.

**We bring the full power of tested technologies to maximize schedule and cost savings for our clients.**

## **Innovation in Building Construction**

We use the latest technology, workflows, and practices as an innovative solution provider to allow early and accurate decision-making, cost and schedule certainty, and high-quality building. To ensure mutual success, these innovations improve collaboration between us, subcontractors, and designers.

## **Innovation in Structural and Civil Drawings**

Our architecture division focuses on innovation and technologies that enhance efficiency and provides smoother cost-effective infrastructure designs, whether it's using photo geometry to better understand infrastructure and services or building 3D models to predict structural clashes.

## **Digital Pull Planning Processes**

Digital pull planning improves project team coordination by collecting project details and providing real-time access to trade partner commitments and the pull planning process. Data obtained and analyzed include the percentage of work completed as expected, the factors for inconsistency, and constraint management.

## **Cost Controlling and Monitoring**

For cash flow and material flow, and cost monitoring we use several types of tools. During the project, we investigate an effective costing baseline with our brilliant team. In addition, we examine the project's financial aspects. We monitor the costing that has been designed for the individual project while executing that stage.

## **Construction**

With our local experienced Engineers, we handle layout with a total station and GPS, piling (cast-in-situ/precast), all types of foundations, and all civil works for single and multistory PEBs having expertise in the area.

## **Health & Safety**

To assure safety throughout construction, we conduct Safety Inductions, Toolbox Meetings, Accident Reports, and display safety signs.

## **Quality Assurance**

By BUET, we test concrete strength, brick, sand, stone chip, and MS Rod, as well as pile integrity and construction quality.

# HOW WE WORK

The incredible team of **CMS EXIM** shares a common goal: to bring value to the customers by providing innovative solutions in the construction of various types of facilities. When entrepreneurs, factory owners, and other associations in need of construction are looking for an ideal partner, **CMS EXIM** stands ready to exceed their expectations. Since its inception in 2020, we have placed a significant priority on the relationships we have developed with our valued customers and our loyal staff. Our approach is smart and simple.

While following the standard set of operating procedures, we deliver what our customers' need we grow based on relationships by listening to our customers and delivering customized services.

We possess a sense of ownership, empowerment, and accountability in order to ensure that our customers receive the best of us.

Our staff is paramount to our client's happiness and ultimate satisfaction. If you are one of our loyal customers, we want to thank the client for their commitment to **CMS EXIM**.
